IT'S GOING TO BE GREEN!

The International Table Tennis Federation (ITTF) has on October 1st. decided that colored table tennis rubbers may also be used in official competition matches in future. A black surface must be used in each case and for the second side the player can choose between red and the new approved colors – so what are you waiting for? From October 1st you can test the GEWO Neoflexx eFT in green. Fun guaranteed!

ARC-HIT TECHNOLOGY

ARC-HIT Technology (Architect) In countless series of tests, the GEWO development team, in cooperation with top GEWO players, designed a solution combining a hard sponge and tacky surface for point-winning, but yet controllable power. Using a new gluing technology for linking the top sheet to the sponge, the revolutionary **ARC Hitting Technology** enables spin-loaded, curved, and long trajectories, putting your opponent under enormous pressure. Optimum energy transfer guarantees maximum speed and perfect grip.

The new **ARC sponge technology** enables players to benefit from harder sponges for more power and dynamics as well as curved trajectories and catapult effect thanks to the elasticity of the special pore array. The innovative **HIT echnology** (Hitting Impact Technology) provides for the control and elasticity, ambitious players need to dominate their opponents with precise, spin-loaded attacks. With an innovative rubber mix and surface, the Codexx rubbers produce more spin with ABS balls and enable optimized energy transfer. The slightly tacky top sheet adds extra spin and provides for dangerous trajectories. With this combination of technologies, the Codexx rubbers will lay the foundation of your success.

THE KEY TO THE ULTIMATE POWER PLAY

The new GEWO Codexx rubber series is designed as a perfect combination of European and Asian rubbers. It combines a dynamic, hard sponge with a slightly tacky, but still flexible top sheet (ARC-HIT Technology). The new GEWO Codexx rubbers are made for dangerous, point-winning close-to-the-table playing and produce tons of power and spin. Compared to the popular Nexxus Hard series, the new Codexx rubbers produce even more rotation, thanks to the slightly tacky top rubber sheet. Due to a longer dwell time (ARC-HIT Technology), they also provide for more control in over-the-table situations. The key to ultimate power play with hard sponges and tacky top sheet.

GEWO | Codexx EL Pro 52

OF-/OF

Designed especially for explosive, close-to-the-table playing styles relying on short-range and quick movement, the new Codexx EL Pro 52.5 (Elastic Power) offers spin, speed, and stability combined with low ball bounce and all the control you will need to find the right answers even in situations when you are under high pressure. This rubber will reveal its full strength in attacking situations, while it still provides more than enough control and feel for spin-rich serves and short stops. This rubber has got everything you need for modern power table tennis.

- Excellent spin ratings for opening topspins against backspin with dangerous trajectory
- Perfect ball coupling in all strokes, no slipping, no uncontrolled bouncing.
- Hard close-to-the-table topspins and counter-topspins plus more than enough power for mid-distance rallies
- Power, stability, and spin for uncompromising close-to-the-table attackers relying on rather short-range and explosive movements and high-speed arm action.

Speed: 135 • Control: 81 • Spin: 128
Sponge hardness: 52° | hard • Thickness: 2.0 mm / max

Item no.: 10300

€ 44.90

GEWO | Codexx EF Pro 54

OF-/OF

Compared to the EL Pro 52 version, the GEWO Codexx EF Pro 54 (Explosive Friction) combines a slightly harder and more compact sponge with a moderately tacky top sheet. It is the perfect weapon for uncompromising, close-to-the-table attackers. EF Pro 54 stands for high-speed power spin and unstoppable attacking. This is just the ideal rubber for hard-working attackers. It is not made for players who haven't yet perfected their technique. Ultimate hardness combined with good control and great spin is all any determined attacker will need.

- GEWO's latest power package for unlimited close-to-the-table power
- Uncompromising attackers relying on explosive, high-speed play will definitely want to give this innovative weapon a try.
- Toxic serves, flat and spin-rich topspins, plus maximum power
- For hardworking players with a good technique who love the direct and linear feel of hard sponges with tacky top sheets.

Speed: 137 • Control: 79 • Spin: 127
Sponge hardness: 54° | hard • Thickness: 2.0 mm / max

DGC40+ 2.0

- ➔ MORE GRIP
- ➔ MORE ROTATION

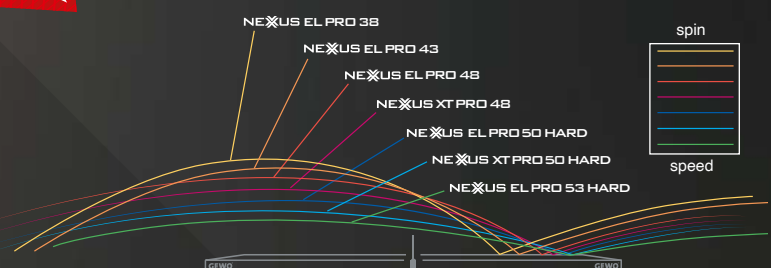

Maximum.Power.Play.

Due to permanent product adjustments, e.g. the introduction of the new ABS balls, rubbers had to be adjusted accordingly to these trends. The latest ball generation produces less rotation and speed. To compensate for this loss in rotation and speed, you have two options: Adjust your technique or your material. GEWO aims at supporting the necessary physical adjustments with innovative solution approaches: A thin, high-grip top sheet (*nexxTT*) compensating the loss in speed and rotation with its inherent dynamics and higher tension (*N.E.P.*). Plus, a medium-pore, dynamic sponge which, depending on the performance variant chosen (XT -> speed; EL -> spin), makes the Nexxus Pro Series a real "Energy Monster", especially the maximum thickness (2,2mm/2,3 mm = Maximum.Power.Play.).

DGC40+ 2.0 One of the factors of success of the GEWO HYPE EL / XT / KR rubbers was the innovative DGC40+ top sheet technology. DGC40+ stands for constant, reliable coupling upon ball contact, and the grippy surface prevents "slipping" of the ball. The introduction of the latest ball generation (e.g. GEWO Select Pro 40+***), however, also calls for a further development and adaptation of the top sheets. The result: DGC40+ „Dynamic-Grip-Concept“ 2.0. The top sheet was specially developed for and adjusted to the requirements of the latest ball generations. If you don't go forward, you go backwards!

NEXXUS PRO HARD

To break the rules, you must first master them! The best choice: The rubber series for top players and players enjoying uncompromising power rubbers. Commitment to continuous improvement, excellent performance and outstanding quality have always been core values of the GEWO tradition.

GEWO | Nexxus XT Pro 50 Hard

OF++

Even more power, more dynamics – Full steam ahead!

The power pack of the Nexxus series with great dynamics and flat trajectories also received an update in respect of power, catapult effect and feeling. The result is a rubber which leaves nothing to be desired as regards speed and attacking power. Certainly, one of the fastest rubber currently in the market. However, thanks to FlexTech technology which provides the rubber with a fine feeling, it is still well controllable so that you will be in full control even at maximum speed. Powerful, close-to-the-table spin shots will put your opponent under extreme pressure. In mid-distance situations, you will be in control of the rally at all times. GEWO Nexxus XT Pro 50 Hard – feel the power of the nexTT.

- Nexxus XT Pro 50 Hard is the ideal partner for players preferring straight and fast playing.
- Flat and dangerous trajectories which will give your opponent no rest.
- Pure dynamics and direct energy transfer for all modern, close-to-the-table stroke techniques.

Speed: 132 • Control: 85 • Spin: 121

GEWO | Nexxus EL Pro 53 Hard

OF++

Faster and harder – GEWO Nexxus EL Pro 53 Hard!

The youngest and hardest member of the Nexxus family is also the fastest rubber in the globally successful Nexxus series. To activate the full power of this rubber, players need reliable technique plus quick and dynamic arm movement. Players mastering this rubber will benefit from maximum speed and even more spin potential. With the new ABS balls, these are just the parameters which are indispensable for modern attackers. Enjoy the linear catapult effect of the hard EL sponge and maximum spin thanks to the combination with DGC40+ surface technology.

- An absolute power pack for uncompromising, close-to-the-table attacking.
- Ideal for players using short and fast arm movements who need maximum speed for their play.
- For hardworking players with good technique. Maximum power for perfect acceleration of the ball.

GEWO | Nexxus EL Pro 50 Hard

OF++

The perfect weapon for uncompromising attacking!

This is the latest power update for the popular top sheet of the Nexxus EL Pro rubber series. The grippy and flexible top rubber sheet still enables spin loaded strokes from any distance and speed variations. However, with GEWO Nexxus EL Pro 50 Hard you can benefit from the additional power of the more compact sponge (hardness 50°). Put your opponent under non-stop pressure. Even from mid-distance, this rubber won't run out of steam, you will always feel the direct and reliable coupling of the ball with the rubber. Perfect for ambitious and high-performing players with fast and short-range stroke movements preferring close-to-the-table playing and looking for a point-winning combination of maximum speed and spin. GEWO Nexxus EL Pro 50 Hard – „improve your game to the next level!“

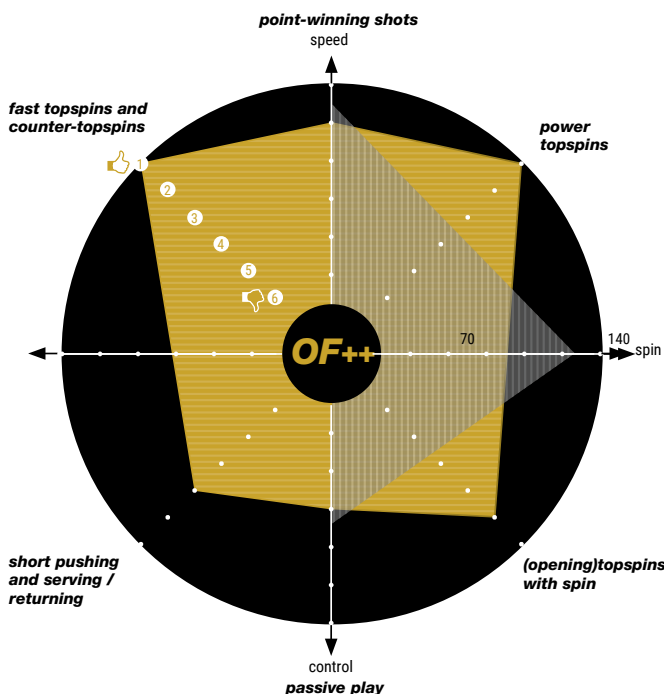

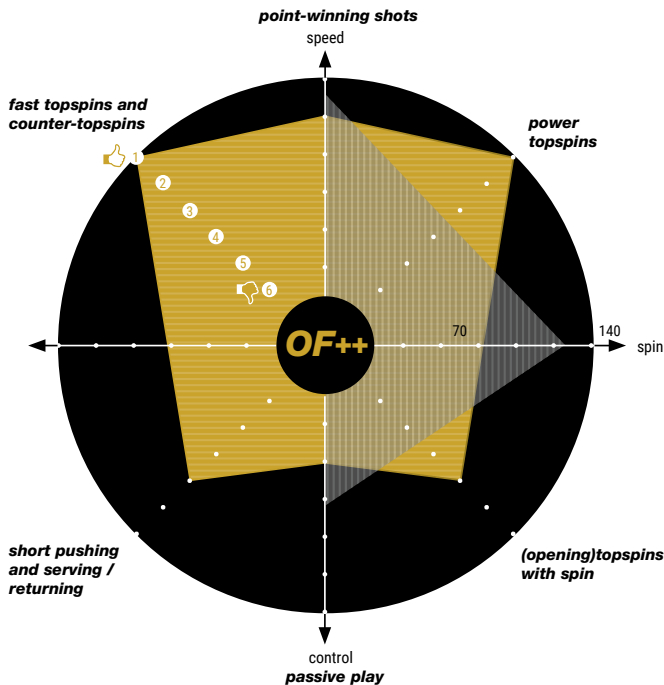

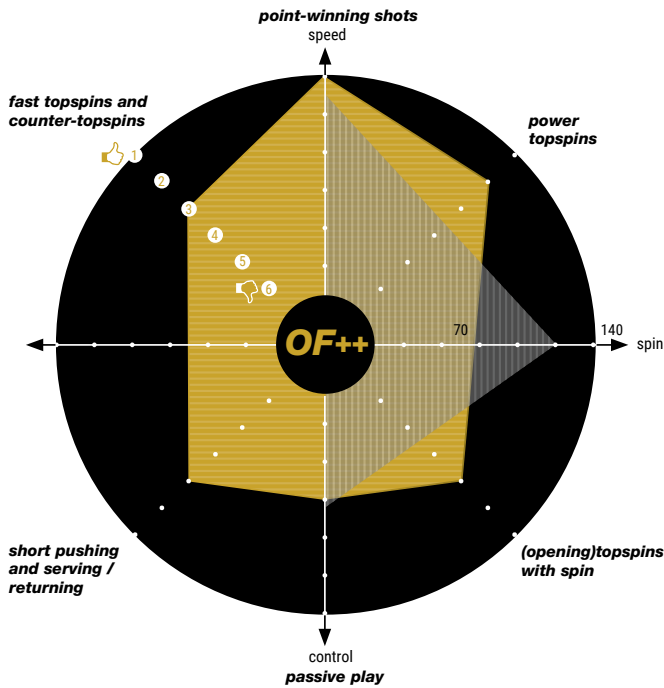

- Made for next-level speed and spin
- Linear and reliable coupling of the ball and perfect energy transfer.
- Power, Spin and feeling for table tennis brought to perfection.

THE NEW STANDARD FOR PERFECT PERFORMANCE

NEXXTABLETENNIS.

GEWO | Nexxus XT Pro 48

OF+

Powerful. Made for Speed. The Power Package of the Nexxus series Maximum dynamics and a flat trajectory combined with enormous catapult effect are the prime features of this power rubber. FLEX-TEC technology provides for maximum speed, while the DGC40+ 2.0 top sheet guarantees consistent and reliable coupling when the bat hits the ball. Especially if used with maXXimum sponge thickness (2.3 mm), this power package unfolds all its power and energy potential. Despite the speed and dynamics of the 48° hard sponge, GEWO Nexxus XT Pro 48 provides for astonishing feel, thanks to its grippy top sheet, and unbelievable reliability for passive strokes used in modern serve/return situations, blocking and flips.

- Flat and direct trajectory characterize this power package.
- Attacking rubber with optimized speed and catapult features, unfolding its full strength and power when taking it to the limit. Uncompromising attacking power!
- Ideal for modern attackers relying on dynamic, speed-focused, close-to-the-table and mid-distance top-spin playing.

Speed: 126 • Control: 90 • Spin: 123

Nexus Pro Series

Long-term test series with the tightest geometrical and playing feature tolerances in different conditions formed the basis: Fine tuning on a new level was the result. It is our mission to create maximum precision rubbers to meet the requirements of modern table tennis. So, once you use GEWO Nexus Pro featuring state-of-the-art technology (nexxTT, N.E.P., MaXXimum. Power.Play.) on you blade, you know what you get: The Very Best.

Recent physical developments (e.g. the new balls) and the experience gained through a long-term design and testing series all over the world (involving numerous GEWO top level and players, talents and coaches from various fields) culminated in one goal: The development of the "nexxTT Generation" rubber series. **Now, we are proud to announce: Mission Completed!**

GEWO | Nexus EL Pro 48

OF

The ultimate solution. Details matter. The master class of the Nexus series. The GEWO Nexus EL Pro 48 will amaze you: whether fast, powerful opening topspins or slower, spin-focused rallies: no problem with this high-end development. You will virtually feel how the ball "digs into" the rubber. Finally, you will be able to attack your opponent with a heavy- spin opener. Precise topspins, versatile attacking, variant-rich serves/returns – this spin-focused power rubber leaves nothing to be desired. The grippy and flexible top rubber sheet provides for maXXimum coupling of the ball in all attacking actions.

- The spin-offensive power package in the GEWO Nexus Pro series: fantastic feel and direct feedback.
- Spin-oriented, explosive-flexible, grippy DGC40+ 2.0 top rubber sheet with extremely good coupling features – in short: the perfect partner for high-performing players.
- For players who are looking for a reliable partner in maXXimum performance situations and try to win their points through powerful, active playing. Strengths: variable, modern, spin-offensive power table tennis!

Speed: 125 • Control: 91 • Spin: 124
Sponge hardness: EUR 46,3° – 48,8° • JP 35,5° – 37,0° / medium+
Thickness: 1.9 / 2.1 mm / maXXimum

Item no.: 8672

€ 49.90

GEWO | Nexus EL Pro 43

OF

Great play. Perform at your best. GEWO Nexus EL Pro 43 is the perfect combination of maximum surface grip (DGC40+ 2.0) and all the power you need for modern spin-offensive playing styles. It forms the speed-elastic middle of the GEWO Nexus EL Pro series and shows its strengths especially in variant-rich, spin-attacking situations. Advantages: safe opening, maXXimum ball feedback thanks to the soft touch both in attacking and passive playing situations. Loads of spin and swerve in serve/return situations thanks to the spinny nexxTT top sheet.

- High trajectory, less proneness to faults when taking your play to the limit; with its 43° medium-hard spin-focused EL sponge, it is a true all-rounder in the Nexus Pro series.
- Ideal for modern offensive players preferring, elastic materials for their variant-rich playing styles.
- For players aiming at winning their points through precise ball placement and spin variants rather than through maximum end speed.

Speed: 118 • Control: 96 • Spin: 128
Sponge hardness: EUR 41,3° – 43,8° • JP 31,5° – 33,0° / medium
Thickness: 1.9 / 2.1 mm / maXXimum

Item no.: 8673

€ 49.90

GEWO | Nexus EL Pro 38

OF-

What a feeling. Precision at its best. Sound on! Experience ultimate playing fun: maXXimum energy transfer, absolute spin, soft touch and perfect ball contact feedback. The soft, spin-oriented sponge/ rubber design (FLEX-TECH) produces unique sound so that you can enjoy maXXimum playing fun. GEWO Nexus EL Pro 38 combines the classic features of a soft rubber, e.g. high control, including passive situations (e.g. blocking, pushing), and feel (e.g. for serving/returning) required in modern table tennis with the modern features of a spin-oriented high-end rubber. That's exactly what GEWO Nexus EL Pro 38 is made for.

- Focused progress for your play: Precision, fantastic touch and sound effect, great forgiveness.
- Experience dynamic sound for great playing fun. Suitable for players of all classes who prefer soft rubbers, but still rely on speed.
- For players focusing on spin-rich and precise placement. In short: a 38° soft "Sound Monster" with the right speed at the right time.

Speed: 109 • Control: 101 • Spin: 127
Sponge hardness: EUR 36,3° – 38,8° • JP 27,5° – 29,0° / soft

ECO BOOST FOR YOUR MATCH

In order to really perform at your very best, you will have to find the right rubber first. Fortunately, there is a simple choice for optimum performance – **GEWO Neoflexx eFT**. The new standard package solution is the perfect combination of versatility, playability and great forgiveness. Eco boost (eTec) is at the focus of this rubber series. eTec guarantees accurate placement, fun and control in all situations – available variants: eFT 48, eFT 45 and FT40. One thing about rubbers became very clear in the many product meetings and test series involving our GEWO coach team: It is not the fastest rubber that makes a champion. "It is as simple as that: In order to succeed, you just need a rubber you can rely on in any situation to win more points than your opponent". This rubber series provides you with everything you need at an excellent cost/performance ratio.

NEAS
New Efficiency
Active System

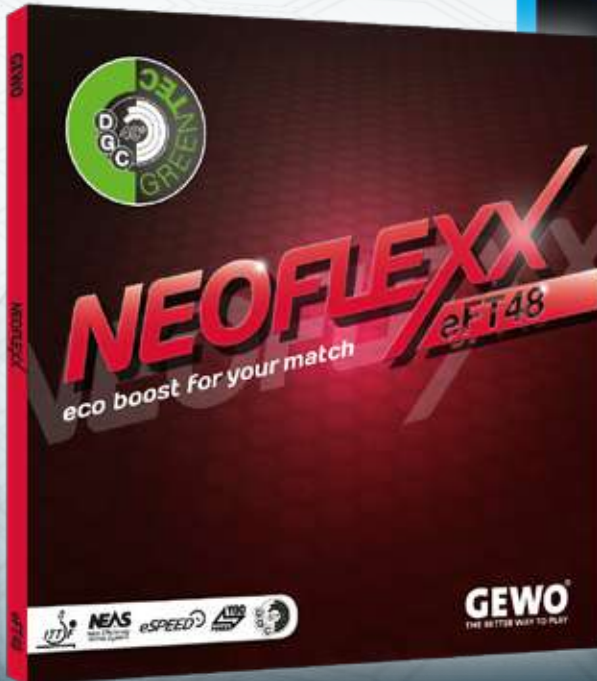

eSPIN
eSPEED

NEAS: "New Efficiency Active System" – unerringly accurate. The newly developed NEAS sponge provides for sufficient speed in all offensive strokes – however, it's control that this series primarily focuses on. Suitable for players of all classes.

eSpeed / eSpin Technology: "eco(nomic) boost for your match" is the motto of this rubber series. This rubber generation is based on a perfect combination of a newly developed sponge with a grippy surface and new pips arrangement. The harder rubbers (45° and 48°) focus on speed (eSpeed) – the softer rubber (40°) on spin. eSpeed / eSpin – perform at your best. GEWO Neoflexx eFT – expect more!

DGC40+: The proven DGC40+ "Dynamic Grip Concept" guarantees uniform, reliable coupling of the ball when it hits the bat, its new surface texture prevents the (poly)ball from "slipping" and energy losses when the ball leaves the rubber. The surface was specially developed for and adjusted to the new requirements of the poly ball.

GEWO | Neoflexx eFT 48

OF

GEWO | Neoflexx eFT 45

OF-

GEWO | Neoflexx eFT 40

AR+

More feel, longer ball contact time and higher spin ratings are the key features of the economic-Tensor rubber GEWO Neoflexx eFT 48. Since the introduction of the new balls, many players have been looking for a new rubber meeting their special requirements: To meet this demand, we developed a new rubber featuring the new DGC40+ surface technology with a grippier surface texture for significantly more adhesion of the ball for more spin – a must-have in modern table tennis. The new pink NEAS sponge provides for sufficient speed in all offensive strokes. Thanks to the new pips geometry and the 48° hardness GEWO sponge, the rubber perfectly adjusts to the ball contact thus ensuring power (eSpeed) and grip (DGC40+) in all situations.

- For dynamic, spin-relying offensive players focusing on topspin attacking but still requiring sufficient control in over-the-table or passive playing situations. The GEWO Neoflexx eFT 48 opens up a whole new dimension of table tennis fun.
- Speed and spin can be varied and controlled just perfectly – the precision of placement is impressive! Great control in serve-and-return situations.
- Ideal for players who would like to try something different than classic rubbers and haven't switched to Tensor yet, but now need more speed and dynamics in their play to cope with the 40+ ball without losing control and reliability.

This economic Tensor rubber features the grippy and transparent DGC40+ surface which has already proved a great success and the new NEAS sponge. GEWO Neoflexx eFT 45 comes with a very grippy, medium hardness DGC40+ top rubber sheet providing you with great grip and dynamics thanks to "Dynamic-Grip-Concept" as well as all that you need for modern table (high trajectory, extraordinary ball rotation and a wide range of spin and stroke variations). The eco-Boost package offers a perfect spin/speed ratio, high versatility and ensures, thanks to the DGC40+ top rubber sheet, high reliability and consistent playing characteristics.

- eco(nomic) boost has high spin ratings, absorbs arriving spin, thus offering great reliability and control.
- Despite the 45.0° NEAS sponge this rubber provides you with all the feel and control you need.
- Perfect for players of all classes relying on offensive all-round play!

The all-rounder in GEWO's eco-boost series. For players searching for the ideal combination of the advantages and control of "classic rubbers" and the features of Tensor based high-performance rubbers. This is exactly what GEWO's eco-Boost provides: moderate speed for topspin attacking, a soft and elastic top rubber sheet and great reliability and control. The soft eSpin-Technology of GEWO Neoflexx eFT 40 guarantees optimum ball control and longer ball contact time for optimum control and forgiveness. Control of the game, that's what this rubber is made for. However, it still has more than enough power for dangerous topspins and smash shots.

- Great for chopping and blocking, spin-absorbing NEAS sponge for optimum reliability and control.
- In your own attacks, the grippy DGC40+ top rubber sheet displays its strengths for high accuracy and precision.
- Perfect rubber for "newbies" in the GEWO Tensor world: For players of all performance classes aiming at improving their techniques and skills through hard work supported by the advantages and dynamics of modern rubbers

THE ULTIMATE WEAPON WITH FLEXIBLE HIGH TENSION TECHNOLOGY

nano FLEX

Choose a rubber that suits you: The innovative revolution of nanoFLEX is the new development with the wow effect. It is a premium rubber with the latest high state-of-the-art technology. Players at all levels have participated during the development and testing of this rubber. GEWO technicians have created a new innovative high tech rubber series with nanoFLEX, a geometry adapted pimple structure. The result is an attacking weapon that gives a catapult like acceleration. The newly developed pimple geometry adapts to the ball surface guaranteeing a highly explosive spinny shot during all playing situations. The highly tacky tension surface generates enormous spin ratings thanks to the very dynamic elastic surface. The nanoFLEX series offers tremendous feeling with the optimum dynamics of spin and power for all professional and serious players.

GEWO | nanoFLEX FT48

OF+

This is the hardest and fastest version with the highest dynamics. A rubber developed for top level professional players who want to win the point with aggressive attacking. Top spins of your opponent can be answered with hard and dangerous counter spins. Despite a tremendous catapult production nanoFLEX FT48 offers utmost control normally seemed unreachable for a rubber of this category. nanoFLEX FT48 an explosive weapon to give your opponent the shivers.

Speed: 120 • Control: 91 • Spin: 115
Sponge hardness: hard • Thickness: 1.9 / 2.1 mm

Item no.: 7194

€ 46.90

GEWO | nanoFLEX FT45

OF

The GEWO nanoFLEX is built with the medium sponge of the nanoFLEX series. This rubber with its medium+ sponge closes the gap between the harder FT48 and the soft FT40 version. Here the pip geometry was developed in order to generate a perfect balance between spin and speed. Whether close to the table or mid distance the FT45 offers more precision pressure play and a great option of varying spin strategies. nanoFLEX FT45 is ideal for top spin players looking for a medium sponge with the main focus on spin and power.

Speed: 113 • Control: 95 • Spin: 115
Sponge hardness: medium+ • Thickness: 1.9 / 2.1 mm

Item no.: 7193

GEWO | nanoFLEX FT40

OF-

The GEWO nanoFLEX FT 40 is a flexible and soft rubber. It gives an excellent feeling and utmost control in all match situations. The enormous sound when playing a top spin stroke gives you a good indication of the power of this rubber. A very tacky surface with a soft and highly dynamic sponge produces powerful spin play for all variations. The fine balance of the flexible nanoFlex surface with a soft sponge is perfect for all players who make high risk attacking strokes from middle distance. A very forgiving rubber reducing error strokes to a minimum. Discover the feeling and joy of top spin variations in all situations.

Speed: 108 • Control: 99 • Spin: 115
Sponge hardness: soft+ • Thickness: 1.7 / 1.9 / 2.1 mm

NEW, FRESH AND YOUNG

Any improvement matters, because every single point can make the difference.

The Proton-XP has been a successful member of the GEWO product family for many years. It has become a real classic for many players of all performance classes. However, „If you don't go forward, you go backwards“, especially in the highly complex world of table tennis rubber design. Now, the story of success

is continued. The international GEWO material experts set out with the goal of combining the proven Proton feel with the demands of modern table tennis. The result is a modified high-end product: The GEWO Proton Neo series.

Quality
made in Germany

GEWO | Proton Neo 450

OF

The premium rubber of the Proton Neo series. It is the hardest and fastest rubber in this series. The Premium Tension high-performance sponge provides for highly efficient spin and speed energy transfer. This guarantees a longer and higher bounce. Aggressive attacking, dangerous blocking and counter-attacking, variable spins or venomous smashes - anything is possible. GEWO Proton Neo 450 is the high-end variant for powerful attacking.

- Best-of-class dynamics, high speed potential – you will feel the potential after just a few strokes.
- Despite the 45.0° sponge, it provides for great feel and control.
- The top rubber for all ambitious players with the highest demands on their equipment.

Speed: 108 • Control: 96 • Spin: 105
Sponge hardness: 45,0° | medium+ • Thickness: 2,0 / 2,2 mm

Item no.: 7757

€ 39.90

GEWO | Proton Neo 375

OF-

Feel for the play, high spin ratings and controlled speed were placed at the focus in the development of Proton Neo 375. The results are: Best-of-class speed, dynamics and spin elasticity scores. Excellent speed ratings for unbelievable variability in topsins, smashes, aggressive blocs or flips. GEWO Proton Neo 375 is medium-soft and thus provides for great feel.

- Maximum playing pleasure, high speed in all strokes, well-balanced speed, control and spin scores.
- Improved and lasting playing features (LifeTec+) and new top rubber sheet (DGC40+).
- For players of all performance classes.

Speed: 105 • Control: 101 • Spin: 105
Sponge hardness: 37,5° | soft+ • Thickness: 1,8 / 2,0 / 2,2 mm

Item no.: 7758

€ 39.90

GEWO | Proton Neo 475

OF

- For dynamic attackers who prefer direct and precise energy transfer into the ball and rely on a good feel
- Whether in offensive topspin play, over-the-table pushing or in passive playing situations, Proton Neo 475 will take your play to a new dimension of fun
- Speed and spin can be varied and controlled just perfectly – the precision of placement is impressive!

Speed: 113 • Control: 95 • Spin: 104
Sponge hardness: 47,5° | hard
Thickness: 2,2 mm

Item no.: 8173

€ 39.90

GEWO | Proton Neo 325

AR+

- Extremely soft sponge (32.5°) for maximum playing fun. Great sound in any stroke.
- Ultimate ball control, high forgiveness, new tacky top rubber sheet (DGC40+).
- For players wanting maximum sound and spin.

Speed: 102 • Control: 103 • Spin: 108
Sponge hardness: 32,5° | soft
Thickness: 1,8 / 2,0 / 2,2 mm

Item no.: 7759

€ 39.90

HALLMARK | Phoenix

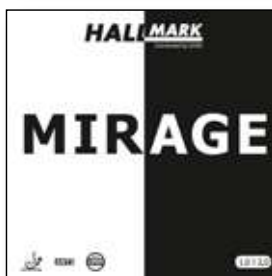

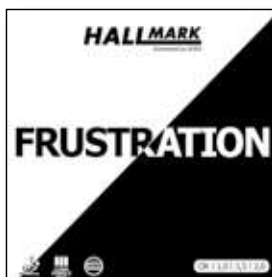

DEF

This interesting long pips-out rubber still features some grip and is designed for players relying on close-to-the-table blocking their opponent's topspins. The special material composition and pips geometry combined with the Hallmark Super-Anti cellular rubber enable high-precision blocking of incoming spin-rich balls. Your blocks will have a flat trajectory and surprising backspin. No-spin balls can be answered aggressively and even with slight spin produced by the rubber itself.

Speed: 75 • Control: 96 • Spin: 45
Sponge hardness: medium • Thickness: OX / 0.5 / 1.0

Item no.: 3971

€ 35.90

HALLMARK | FRICTION SPECIAL 2

DEF

This long pips-out rubber, though having high grip, still produces irritating pips-out effects. Friction Special 2 is a rather slow type among pips-out rubbers. Recommended especially for the back-hand of defensive players relying on close-to-the-table blocking variants.

Speed: 80 • Control: 92 • Spin: 53
Thickness: OX

Item no.: 5312

€ 39.90

HALLMARK | Frustration

DEF+

Frustration is a very popular long pips-out rubber offering extra grip for a wide range of pips-out strategies. You can easily produce no-spin balls and, with the right wrist action, balls with surprising spin. Of course, the regular pips-out effect against topspins is also generated.

Speed: 85 • Control: 90 • Spin: 50
Sponge hardness: medium • Thickness: OX / 1.0 / 1.5 / 2.0 mm

Item no.: 1251

€ 39.90

HALLMARK | Green Power

OF

Green Power is a fast attacking rubber developed for players who used to speed glue before the ban. The special formula introduces tension between the molecules to produce a rubber ideal for the modern fast attacking game. Excellent speed and spin are generated, combined with high levels of control which is sure to give your opponent plenty of problems.

Speed: 100 • Control: 98 • Spin: 97
Sponge hardness: hard • Thickness: 1.5 / 1.8 / 2.1 / Max mm

Item no.: 3973

€ 29.90

HALLMARK | Power Spin

OF-

Rubber producing great spin. The 2.1 mm version is fast and ideal for powerful attacking. The 1.5 mm version provides for good control. The 1.0 mm version is the top choice for defenders relying on flexible and dangerous spin variations.

Speed: 91 • Control: 97 • Spin: 100
Sponge hardness: soft • Thickness: 1.0 / 1.5 / 2.1 mm

Item no.: 3970

€ 29.90

HALLMARK | Panther

AR

Our Panther is a medium pips-out rubber. Panther combines the control of short pips with the effect of long pips. It gives you excellent control with a down-pulling effect, especially when blocking topspins. The OX and 1.0 mm versions are ideal for defenders who combine their defense techniques with dangerous attacks.

Speed: 93 • Control: 96 • Spin: 68
Sponge hardness: medium • Thickness: OX / 1.0 / 1.5 / 2.0 mm

Item no.: 2625

€ 29.90

HALLMARK | Mirage

DEF

Dangerous anti-spin rubber. The super-slow Cellular rubber slows down the fast topspins. Long defence with much backspin is possible. Attacking shots are very difficult to return and pushes develop an irritating forward spin.

Speed: 50 • Control: 100 • Spin: 40
Sponge hardness: medium • Thickness: 1.5 / 2.0 mm

Item no.: 3972

€ 29.90

HALLMARK | Podium

AR+

This soft, high-grip rubber is ideal for effective and dangerous spin variations. Thanks to the flexible material mix, you will always be in control of the situation and surprise your opponent with your variant-rich playing style.

Speed: 87 • Control: 94 • Spin: 97
Sponge hardness: medium • Thickness: 1.5 / 2.0 / Max mm

Item no.: 9708

€ 29.90

HALLMARK | Magic Pips

AR

Great choice for modern blocking with short pips. Magic Pips features rather wide and short pips. The wide pimples are ideal for close-to-the-table blocking as well as own attacks. The 1.5 and 2.0 mm versions provide for more spin in your own attacks, while the OX and 1.0 mm produce more deceleration when it comes to topspin blocking. The OX and 1.0 mm versions are very popular among classic defensive players relying on variable spin-rich and no-spin techniques.

Speed: 95 • Control: 97 • Spin: 92
Sponge hardness: medium • Thickness: OX / 1.0 / 1.5 / 2.0 mm

Item no.: 2944

€ 35.90

HALLMARK | Tactics-LP

DEF/AR

Tactics LP is probably the most spectacular material innovation launched by Hallmark in the past few years. Tactics LP is a long pips-out rubber especially designed for the ABS plastic ball, featuring unbelievable pips-out effects for highly dangerous, hard-to-return balls. The pips are as long as permitted by the ITTF rules and regulations, and they are also exceptionally wide. This guarantees incredibly low ball bounce, the ball will drop down very quickly once it is over the net. In blocking situations, Tactics LP is easy to play and control and highly forgiving. Even the most extreme topspins can be returned easily. In addition, Tactics LP can produce unusual spin itself, which makes it even more dangerous. Material enthusiasts around the world will love the new Hallmark Tactics LP with its extremely annoying spin reversal and extraordinary defense options.

Speed: 50 | Control: 94 | Spin: 107

Thickness: OX / 0,5 / 1,0 / 1,2 mm | Sponge hardness: Medium

Item no. 10341

€ 38.90

HALLMARK | Destroyer

DEF

Hallmark Destroyer is an easy-to-control pips-out rubber. Compared to classic long pips-out rubbers, the pips of the Destroyer are slightly shorter, but still longer than in medium pips-out rubbers. This makes Hallmark Destroyer very versatile. In blocking situations, the Destroyer produces a distinct and dangerous pips-out effect. It can still be handled by relatively unpracticed players with little long pips-out experience and features excellent spin reversal which is perfect for point-winning, active blocking. The Destroyer is the perfect choice for any blocker considering switching from pips-in to pips-out rubbers. Various options in active situations make the Destroyer an efficient and dangerous weapon for any type of player. It also offers great performance in defense situations. Safe chopping and sudden attacking are possible without having to twiddle or change your technique.

Speed: 45 | Control: 93 | Spin: 99

Thickness: OX / 0,5 / 1,0 / 1,2 mm | Sponge hardness: Medium

Item no. 10317

€ 34.90

HALLMARK | Devil-Anti

DEF/AR+

Hallmarks Devil Anti isn't really a classic anti-rubber. In addition to excellent anti-effect, this rubber also enables very controlled attacking. Devil Anti reveals its full strength when it comes to blocking. With this rubber, you will be able to return even the hardest topspins. Players relying on classic defending and surprising dangerous mid-distance attacking may definitely want to give Devil Anti a try, not least because even hobby players can handle the rubber without a lot of practice thanks to the exceptionally high control ratings. Hallmark Devil Anti is THE rubber for anti-spin players who act close to the table and use their anti-material for surprising attacking.

Speed: 69 | Control: 97 | Spin: 40

Thickness: 1,2 / 1,5 / 1,9 mm / Max | Sponge hardness: Soft

Item no. 10290

€ 32.90

AK Aleksandar Karakašević

AFRICAN CHAMPION RELIES ON GEWO!

Wherever Quadri Aruna is about to compete, spectators around the world know that they will get the most spectacular rallies for their money. The multiple African Cup winner is famous for his powerful forehand topspins and out-of-this-world playing style. No wonder that Aruna first entered the Top20 in the world rankings in 2018 and is now one of the top stars of the table tennis family. As far as his material is concerned, he must definitely be on the safe side, and this is why he has been relying on our GEWO products since the summer of 2019. The close cooperation of our experienced blade experts and top player, Quadri Aruna, resulted in a blade series which meets the highest demands and was especially designed for fans of fine veneers. **100% Aruna!**

1 GEWO | Aruna Hinoki Carbon OFF

OF/OF+

The legend's blade. As versatile and creative as its name-giver. GEWO Aruna Hinoki Carbon Off is very balanced, precise and provides nice and direct feedback. For a carbon blade, it provides great feel and control, and still has more than enough topspin and smashing power and speed. Aruna Hinoki Carbon Off supports all offensive playing systems and still leaves sufficient control options for passive playing. The outer ply made of the finest, carefully selected Hinoki veneers provides the special touch and excellent feel. The soft core gives great control and harmonizes perfectly with the carbon fibers. Gewo Aruna Hinoki Carbon Off – for sophisticated players.

Speed: 101 • Control: 88 • Weight: 90 g • Handle: FL, AN, ST

Item no.: 9448 **€ 139.90**

2 GEWO | Aruna OFF

OF

GEWO Aruna OFF is made of 7 specially selected and tested wooden plies glued together to produce an OFF power blade bursting with energy. Players who feel that carbon-reinforced blades are rather stiff and too fast, but are still looking for a powerful Off blade with sufficient speed to meet the demands of the new ABS balls, might want to take a closer look at the new GEWO Aruna OFF. The blade is designed for close-to-the-table and mid-distance topspin/counterspin rallies, and still provides sufficient control and feedback for over-the-table playing.

Speed: 97 • Control: 91 • Weight: 88 g • Handle: FL, AN, ST

Item no.: 9450 **€ 79.90**

3 GEWO | Aruna Energy ARC OFF

OF/OF+

The fastest blade of the Aruna series! GEWO Aruna Energy ARC OFF combines 5 wooden and 2 aramide carbon fiber plies such that a balanced combination of speed, hardness and control for passive and spin-rich strokes is obtained. If you are looking for the perfect balance of speed and control for powerful attacking without any compromises as regards spin, you may want to take a shot at GEWO Aruna Energy ARC.

Speed: 103 • Control: 84 • Weight: 87 g • Handle: FL, AN, ST

Item no.: 9449 **€ 109.90**

4 GEWO | Aruna Carbon ALL+

AR+

A blade designed for creative allround players who need to rely on consistent features of their blade in any situation. The 5-ply ALL design is rather thin and is stabilized by two carbon layers. This results in a harmonic combination of great control and precise attacking potential. The GEWO Aruna ALL+ is recommended for players who feel that most OFF blades are just too fast and many ALL blades are too slow with insufficient linearity.

Speed: 86 • Control: 97 • Weight: 89 g • Handle: FL, AN, ST

Item no.: 9451 **€ 94.90**

5 GEWO | Aruna Kids

OF-

The classic veneer design without synthetic fibers features a handle which is optimized for children's hands and has a slightly smaller blade surface. This makes GEWO Aruna Kids the perfect companion of young table tennis talents on their way to the top. Not too fast, a bit lighter than most blades, but still enough power and great control to make sure that our young players won't have to switch blades again at a very early stage when their technique gets better and their strokes are more powerful and faster.

Speed: 87 • Control: 95 • Weight: 78 g • Handle: FL, AN, ST

Item no.: 9452 **€ 49.90**

GEWO[®]
THE BETTER WAY TO PLAY

INNOVATION, FEELING, PERFORMANCE – INSPIRED BY THE CRAFTS

The ultimate blade series to take your play to the next level. To perform at your best, you need the right equipment. This is why GEWO designs, develops and manufactures blades that meet our innovation, performance and high-end material quality requirements. **Our mission: Find a perfect combination of speed, feeling and performance.** This was the starting point of the new "Sensus" project, involving a team of recognized blade experts, players and coaches from the most different performance levels. The project resulted in three fantastic blades supporting modern table tennis players of all styles in taking their play to the next level. Two groundbreaking new technologies form the basis of these blades:

SENSUS

THE BLADE
PLAYED BY
ALVARO ROBLES,
WORLD CHAMPION-
SHIPS RUNNER-UP
IN MEN'S DOUBLES
2019.

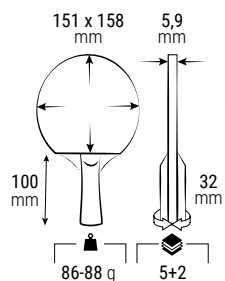

GEWO | Sensus Carbo Speed

OF

Aramid Carbon blade made in Europe.

This fast high-quality Aramid Carbon blade was created in close cooperation with GEWO's top players. Typical AC features include great dynamics and excellent feedback providing extra control for variable offensive playing. Sensus Carbo Speed combines the advantages of the high-tech Aramid Carbon fiber with carefully selected wood plies. It has an offensive character and is ideal for variable attacking. Perfect Sweet Spot for all modern playing techniques, especially topspin and counter-topspin. Perfect energy transfer, well-balanced and not too top-heavy. For optimum over-the-table acceleration and sufficient mid-distance speed. GEWO Sensus Carbo Speed – the World Elite's choice.

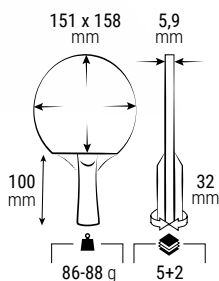

Speed: 102
Con- 84
trol: FL, AN, ST
Handle:
Item no.: 9099
€ 124.90

GEWO | Sensus Carbo Touch

OF-/OF

Inner Aramid Carbon blade made in Europe.

Thanks to the Aramid Carbon fiber layer placed between the core and middle ply, the blade provides for a softer and more controlled touch than most carbon blades. However, this does not affect the features typical to carbon, i.e. precision and dynamics. This blade is ideal for players who want extra speed and spin without losing control. The blade is a slightly less aggressive than Gewo Sensus Carbo Speed as the Aramid Carbon fibers are closer to the core. This results in excellent feeling for the ball. The Aramid Carbon fibers reduce vibration and give the blade the required precision and dynamics.

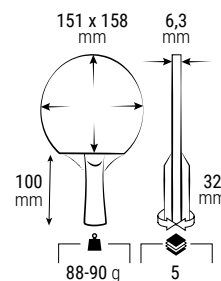

Speed: 94

€ 119.90

GEWO | Sensus Powerfeeling

OF

True nature blade made in Europe.

The 5-ply GEWO Sensus Powerfeeling offensive blade is ideal for any playing situation. It provides for excellent feedback and enables both controlled topspins and direct attacking shots. Absorbs the speed of your opponent's ball. Great for blocking. Special features: The perfectly balanced blade is traditionally made in Europe - however, the special „Japanese Film Glue“ is used for the first time. This glue has an impact on the hardness and speed of the blade: It is faster and slightly harder compared to blades made using traditional glues. Power and feeling united in one blade. Natural high-end product (True Nature Tec!)

BENCE MAJOROS
No 61 World Ranking
(06/2021)

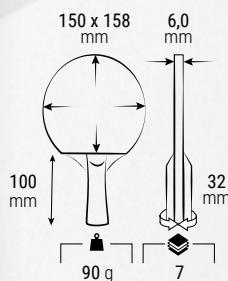

**GEWO
PRO-PLAYER-
SERIES**

GEWO | Bence Majoros OFF

OF

Perfection to the smallest detail: Aspiring young professional players like Bence Majoros from Hungary play an important part in material development at GEWO. Our promise – at GEWO, top contract players and brand ambassadors actually do use our equipment. "Thanks to the individually designed ply structure, I am always in control of my stroke with perfect ball contact feedback. My playing style is pretty aggressive because I always try to win my points quickly and directly. GEWO Bence Majoros OFF is just the perfect partner for me, especially in the tight matches against top 10 players in the world rankings", says the junior professional. Good ball contact feedback in difficult situations (e.g. topspin-against-topspin rallies) is extremely important in high-end table tennis. This OFF blade is designed for ambitious players who prefer fast and stiff blades and focus on winning points quickly. It provides great power for active close-to-the-table and mid-distance playing.

Speed: 102
Control: 88
Handle: FL, AN, ST

Item no.: 8643

€ 57.90

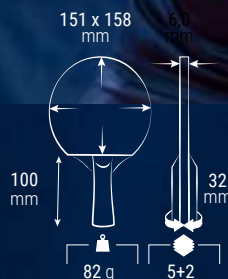

**ALEKSANDER
KARAKASEVIC**
4x European Champion
Mixed Double

GEWO | Karas Scepter

OF

Aleksandar Karakasevic (King Kara) still is a synonym for extraordinary feel for the ball and spectacular topspin strokes. It is, above all, his spectacular backhand which leaves his fans speechless and gives his opponents a very hard time. When it comes to their materials, professionals must not leave anything to chance, and this is why like King Kara relies on GEWO products. GEWO Karas Scepter features an innovative, harder Premium Carbon Material which provides for stable ball bouncing, balanced hardness, and a longer dwell time. The synthetic fiber is placed directly under the 0.8 mm thick outer Limba plies. This enables very efficient topspins and counter-topspins, but still offers more than enough control for over-the-table Touch Play and passive playing situations. GEWO Karas Scepter offers a plain, not too hard touch and provides great spin support in any situation. The perfect symbiosis of feeling, power, and optimized energy transfer. For high-performing players relying on fast synthetic fiber blades with a good feeling to meet the requirements of modern high-speed table tennis.

Alvaro Robles

**VICE WORLD CHAMPION
MEN'S DOUBLE 2019**

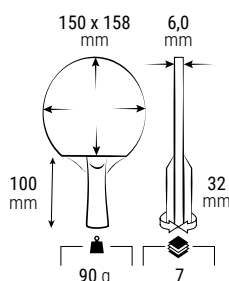

**DESIGNED & DEVELOPED
BY GERMAN ENGINEERS**

GEWO | Alvaro Robles OFF

OF

When asked about GEWO Alvaro Robles, the Spanish world class player said: "This blade is perfectly adjusted to my aggressive playing style but leaves nothing to be desired as regards feel. With this blade, I can no longer put the blame on the bat." This 7-ply veneer design without carbon (Limba / Samba) provides for great feel from the very beginning without any compromises as regards speed. This is the crucial point for many players: Can I rely on my material in difficult situations? According to Alvaro You Can! The top features of GEWO Alvaro Robles OFF are the second-to-none feel and the consistent bouncing characteristics. Great speed, excellent balance and top control, with this blade you can virtually guide the ball even in the most critical situations: The greatest challenge for our material developers was to find the ideal combination of these features. Partnering with top producers worldwide, GEWO met this challenge perfectly. Joint passion. The result is a fully balanced OFF blade, made from carefully selected, specially tested wood plies.

GEWO | Alvaro Robles OFF-

OF-

The 5-ply Alvaro Robles OFF- is ideal for any playing situation. Depending on your choice of rubbers, this blade can be used not only for powerful but controllable attacking, it also provides you with all the flexibility you need in passive situations. It offers excellent ball-contact feedback and control in any kind of stroke and supports both well-controlled topspins and direct attacking. You will also enjoy its features when it comes to over-the-table pushing or serving/returning. Thanks to its soft touch and the typical high-end GEWO workmanship, GEWO Alvaro Robles OFF- is the perfect blade for any all-round topspin player. Variant-rich OFFminus blade for all stroke techniques such as blocking, smashing, pushing or spinny loops – the All-rounder in our Pro Player Series.

The GEWO Balsa Carbon series

ROBUST, LIGHT AND INNOVATIVE

GEWO | Balsa Carbon 775

OF+

GEWO Balsa Carbon 775 is a modern OFF blade featuring the latest high-tech materials. GEWO Balsa Carbon 775 is one of the fastest blades from the GEWO blades range. The 7.75 mm thick Balsa centre ply produces all the power and speed you need for your attacks, without neglecting control and reliability in passive situations. The soft, vertical-cut balsa ply in combination with premium-end 1K-Carbon make the blade a true "Power Tool" for uncompromising attackers. Low-trajectory high-speed topspins and aggressive blocks will give your opponents the shivers.

GEWO | Balsa Carbon 575

OF-

GEWO Balsa Carbon 575 is a controlled, well-balanced OFF- blade. Ideal for spin-oriented, direct, close-to-the-table attacking. High forgiveness on "off-centre" topspin hits. GEWO Balsa Carbon 575 is just perfect for players relying on powerful, high-precision ALL/ OFF playing. Thanks to the 5.75 mm thick, vertically cut balsa centre ply, your offensive strokes will have just enough speed at full control. Precise and well-placed attacks, high-speed topspin rallies as well as all passive strokes come easy with GEWO Balsa Carbon 575. Ultimate "feel-good" blade thanks to the combination of soft balsa material and premium 1K-Carbon: For all players relying on powerful and controlled attacking.

GEWO | Balsa Carbon 375

AR

GEWO Balsa Carbon 375 is a modern premium-end ALL blade. State-of-the-art materials and the soft balsa give the blade the feel and control you will need in all passive playing situations. In addition, GEWO Balsa Carbon 375 provides sufficient power for starting your own controlled attacking any time you're ready. Perfect blade for versatile all-rounders relying on precise placement and speed variations to win points. Modern defenders taking every opportunity for own attacks will also be inspired. High-tech 1K-Carbon combined with the proven balsa material provides for a larger sweet spot. This means more forgiveness on "off-centre" hits.

POWER FEEDBACK

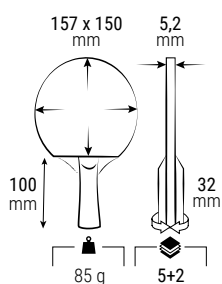

GEWO®
THE BETTER WAY TO PLAY

GEWO | Force ARC

OF

This component production is made with a 7 layered offensive blade. It combines the High-Tech-Materials Carbon and Aramid (ARC) with high quality, deposited wood veneers. Carbon provides high speed and extreme stability, and Aramid provides a good feeling. Feel the balanced hardness and the optimal feeling. Consistent playability on nearly the entire blade by specially selected veneers. The achieved stiffness leads to a high stability and a straight pressure in the game. The high strained, stabilizing Aramid Carbon layers provide extra speed, that you need for a powerful and dynamic offensive play. Powerful play with the consistent variations of the ARC materials. With the Force ARC each player can place the ball close to the table perfectly and act out of half distance with fast and hard topspins. The premium blade Force ARC is recommended for topspin players with main focus speed, who want the rally to be aggressive and want to impose the opponent's own game. Feel the best accuracy in all your strokes and win the points decisive

GEWO | Zoom Balance All+

AR+

GEWO Zoom Balance ALL combines three premium wood plies Kiri, Ayous to each other. With the inner Ayous plies and a Kiri middle ply, it makes a great combination of balance and feel („Rubber Impulse“). The layers provide for a large Sweet Spot, good bending strength and unique Power Feedback to meet the requirements of modern table tennis. The speed and control values of this ALL blade were carefully chosen and enable easy switching from passive to active playing and vice versa within the rally. You will always be in control thanks to unique „Power Feedback“. This feature is ideal for passive strokes like blocks, pushes, and well-placed returns which will put your opponent under pressure right from the start. Carefully selected wood plies provide for great feel making the blade a great choice for allrounders. In addition to excellent control, the blade also has sufficient speed potential for your own attacks.

GEWO | Zoom Pro OFF-

OF-

Zoom Pro the easiest way to improve your game. Medium-soft core and harder outer veneers. Due to the special bonding, the energy is released step by step and continuously released. The Zoom Pro is very easy to play and gives you a very good balance between speed, feeling and weight. It plays very variable and is suitable for all offensive game systems. From aggressive top spin players to half distance to block and counter at the table. The blade provides precision and pressure in the offensive game. It never forgets the importance of control and flexibility and offers an unsurpassed feeling in a passive play. The Zoom Pro develops a lot of speed and is very precise and controlled. The fine-tuned-5 layer veneers provide an excellent ball contact time and completely new gaming experience. The Zoom Pro is a topblade in this speed class and first choice when you are looking for a high quality blade. This modern blade has its followers among players of all divisions.

GEWO | Power Control

OF-

New design and better playing features. This blade offers excellent control at surprising speed! The new Power Control unites the power of an offensive blade with the great feel of an all-round blade. For attacking all-rounders relying on precision. It combines lightness, great feel, control and power in a „tamed“ variant. With precise blocking and controlled or fast variable-spin strokes, you can put great pressure on your opponent, while you are in control of ball placement at all times. Recommended for players who prefer acting from mid-distance or for close-to-the-table, variable-spin players. This blade is also ideal for counter-attackers/blockers thanks to its direct and sensitive feedback.

GEWO | Hybrid Carbon X/Speed Off

OF

Thanks to CFL Technology, the Hybrid Carbon X/Speed provides unbelievable directional stability, especially in high-speed rallies. A premium-end offensive blade with exceptional power. The unique composite structure of the blade not only enables fast and hard playing but also provides for a new spin experience. Featuring a stabilized sweetspot for even more reliability and precision, this blade generates to-the-point attacking power even in critical situations. Compared to standard blades in this category, the Hybrid Carbon X/Speed provides much more feedback when the bat hits the ball. Experience breath-taking acceleration with CFL Technology. This blade will be a thrill for any demanding, performance-oriented player.

1 GEWO | HydroTec Glue

The glue GEWO HydroTec is based on 100% of liquid caoutchouc. It's a solvent-free water-based table tennis glue („HydroTec“) and is completely free of volatile organic compounds (VOC-free). The application is simple and easy and it also improves the playing effects of large-pored sponges. The short drying time of the glue is impressive. It is easy to remove your table tennis rubber from the blade without damaging the sponge. It is also no problem to remove the glue residues from either blade or rubber.

Volume: 37 ml (+6 sponges)
Item no.: 7504
€ 8.90 € 24.05 (Baseprice: 100 ml)
Volume: 90 ml (+15 sponges)

GEWO | Cleaning sponge

Made of synthetic leather. Item no.: 8147

€ 2.50

GEWO | Plastic covering Protect

The special protective foil bag designed by GEWO protects any table tennis rubber against dust exposure. The handy foil bag prevents the sensitive rubber surface from becoming brittle due to exposure to atmospheric oxygen. After your match, clean the rubber with GEWO Fair Clean rubber cleaner and GEWO microfiber sponge. Put the head of the blade in the foil bag making sure to avoid air bubbles between the rubber and foil. Longer rubber life and preservation of properties. Without racket.

5 years guarantee.

Meets all requirements
of wheelchair sports

GEWO SC 25 Premium

GEWO SC 25 Premium is the premium model of the GEWO table series. Pure elegance, long life, compactness, stability, maximum and state-of-the-art safety standards plus excellent and consistent bouncing – GEWO SC 25 Premium is the perfect choice! Two years of development resulted in an innovative High-Class competition table which is delivered fully assembled and is ready for use once you have removed the packaging. The "dynamic" design of the table reflects everything that makes table tennis so fascinating: The special-grain surface (25 mm thick) made of hard-wearing fine chipboard with paint top finish provides for very consistent bouncing of the ball and excellent feel. "Skidding" of the ball is reduced significantly – this is a great point of sale considering the shift from celluloid to poly balls.

Great design, space saving and sophisticated safety systems for intuitive and safe handling. This table is excellent art of engineering "made in Germany". 125 mm ball-bearing swivel casters with rubber tread and two parking brakes ensure a safe stand in training and competition.

Thanks to the elaborate and intuitive mechanical interlock/safety system, the GEWO SC 25 Premium is easy to use and provides for maximum safety. The SC ("super compact") system developed for GEWO enables easy folding of the table via the "SC gear" (special functional unit connecting the two 25 mm table elements).

GEWO SC 25 Premium is ITTF approved for use in league competition. The SC 25 Premium is the top-end product in the GEWO table series as regards state-of-the-art design, durability, minimum space requirements, high-quality playing features and setup/takedown safety.

The sophisticated design also considered additional details: with a 400 mm clearance between the edge of the table and the frame, it meets all requirements of wheelchair sports. Each of the 4 table legs is equipped with adjustable feet for perfect adjustment of the height of the table on the players' sides. The table comes fully assembled and packed in special cardboard packaging.

The steel tube and reinforcement frames which are screwed to the surface and joined using stable corner connectors provide for maximum stability during use, setup/takedown, moving, transport and storage.

- GEWO SC 25 Premium is ITTF approved and meets the European standard requirements of DIN EN 14468-1.
- 5 year GEWO long-life warranty for frame components and mechanical system.
- very space-saving storage dimensions:
 - storage dimensions (table in parking position): 1525mm (length) / 478mm (width) / 1620mm (height)
 - packaging dimensions (table in cardboard packaging): 1540mm (length) / 410mm (width) / 1680mm (height)
- Weight: Table unpacked: 121kg; packed table ready for shipment: 130.5kg
- Surface: 25 mm green or blue
- Frames: Steel tube frame 50 x 20 mm and reinforcing frame 30 x 20 mm (powder coated)
- Folding leg: 60 mm (stand) welded with round tubes incl. adjustable feet
- Undercarriage: Round tube 60 mm (stand) welded with 50 mm crossbar
- Gearing mechanism: Special functional unit including leg folder bar (flat oval tube 50 x 20 mm), galvanized screws
- Pivot points / functional parts: Square tube braces 40 x 20 mm, screwed to surface at several points, galvanized screws
- Casters: 2 swivel casters 125 mm with parking brake, 2 swivel casters 125 mm, ball bearing mounted slewing ring and wheel (metal case / plastic wheel with abrasion-proof rubber tread)

Colours: green, blue
Item no.: 8268

GEWO-matic SC 25

This competition table meets Class A requirements of EN 14468-1 and is ITTF-approved. Long life, compact, stable and robust. Competition table with 25 mm thick high-performance surface. Powder-coated frame sections with reinforced support area for uniform bouncing. Fine-adjustable legs. The patented, gas-filled absorber supported, synchronous folding design enables effortless folding. Premium playing properties and compact storage dimensions 152.5 x 55 x 162 cm (L x W x H). 100% pre-assembled in the factory. Simply remove the packaging and start playing. ITTF-approved. 3-year GEWO long-term warranty. Official table of the Hamburg Table Tennis Association.

Colours: green, blue
Item no.: 3143

ITTF approved.

GEWO | CS Pro

The 25mm special game surface allows a quick and even ball jump. The base is made of high quality metal and absolutely stable. Two fuses on each half of the table provide the necessary safety during assembly and disassembly. Since both halves of the table are mounted separately on the rollers, the GEWO CS PRO can be easily assembled and also saves space. The table is ideal for club and school sports. Outstanding value for money!

Colours: blue
Item no.: 8849

ITTF approved.

GEWO | europa 25

High-end competition table for use in national and international tournaments and competitions. Robust table for club use. The table meets Class A requirements of EN 14468-1. The 25 mm thick Micro fine chipboard guarantees optimum high-speed playing properties. The playing surface receives several pre-treatments and is finally provided with a special curtain coating finish. This special coating guarantees a high sliding friction coefficient at a very low gloss level. The lines are silkscreened in a very thin, non-feelable layer. In this way, the playing properties are the same as in the playing surface of the table. Yoke frame with easy-to-use folding mechanism for quick setup and storage. Each half is provided with 2 large wheels for easy vertical transport.

Very compact storage dimensions: L: 152.5 cm, W: 16.5 cm, H: 142 cm, H: Competition table according to EN 14468-1. Net sets are not included in any table.

Colours: green, blue
Item no.: 3560

ITTF approved.

GEWO compact roller 25

High-quality competition table. Featuring a 22 mm thick special surface providing for optimum, high-speed playing properties and ensuring uniform bouncing of the ball. Robust, durable steel frame. Automatically engaging locks.

Colours: blue, green
Item no.: 2533
